

**South West Thames Institute for Renal Research
£30,002 to £47,175 pa, plus HCAS**

Fixed term contract from October 2014 - 2017

We are seeking to appoint a clinically trained research fellow, to undertake an innovative laboratory based research project investigating novel mechanisms of renal fibrosis under the supervision of Dr Mark Dockrell in collaboration with King's College London.

You must be able to demonstrate a keen interest in research and would be expected to register for a higher degree such as a PhD.

You will be required to undertake one clinic a week at a satellite centre and contribute to the on-call rota at a minimum of ST3 level renal registrar in the South West Thames Renal Unit at St Helier Hospital.

You must also hold MRCP and be fully registered with the General Medical Council; eligibility to practice at registrar level within the UK is a pre-requisite.

For further information, please contact Dr Mark Dockrell, on Mark.dockrell@esth.nhs.uk or telephone 020 8296 2965.

To apply for this post please log onto www.jobs.nhs.uk quote references 343-SK-REN608 and complete the online application form.

Closing date: 17 March 2014.

Committed to equal opportunities
